

Digitise the signature witnessing process for easier agreement completion in the UK

There are many steps to digitising contracts and agreements. From the initial preparation of documents requiring a signature, to the collection of signatures from all parties, and additional post-signing management of an agreement, technology has gradually been developed to save time and money. Now, technology has helped to overcome one of the trickiest of areas: witnessing a signature.

Electronic agreement execution is a critical digital step that has long been demanded by both the legal profession and their clients in order to avoid delays and costs from printing off paper copies and sending them through the post.

DocuSign eWitness offers a fast and easy way to obtain signatures on documents that require a witness

- Digitise paper deeds and sensitive agreements by enabling seamless electronic witnessing
- Capture witness details for traceability and auditability
- Preserve agreement confidentiality by limiting witness access post-signing
- Add SMS verification for identity authentication and meet specific requirements like HMLR
- Simplify the witnessing process for all parties (senders, signers, witnesses)
- Save time and money by making the entire process completely digital
- Reduce environmental impact

Seamless experience

DocuSign eWitness is a feature of DocuSign eSignature so you can enable your signers to specify witnesses for an agreement that needs witnessing in the UK.

Key capabilities

Get going quickly

DocuSign eWitness is flexible, easily configurable and easy to use for all parties, including senders, signers and witnesses. Senders can configure agreements that require witnesses with DocuSign's powerful workflows and tags, while signers can specify the identity of the witnesses at time of signing the document.

Accelerate Agreement Completion

Digitise manual and paper-based processes to speed up the contracting process. What used to take weeks can now be completed within a few hours, and even minutes and eliminate unnecessary printing of paper heavy agreements.

Capture Witness Evidence

Every document signed with DocuSign eWitness comes with a Certificate of Completion which provides supporting evidence of the signature process that can be used in a legal dispute.

For transactions with witness recipients, information about the witness, such as occupation, address, email address, IP address and time stamps, is also captured in the Certificate of Completion to provide auditability of signature and witnessing process to all transaction parties.

Reduced Risk

Add SMS verification for sensitive agreements and deeds that require identity authentication before a digital certificate is issued.

Ensure Security

Stay confident with our strong security and encryption practices.
